BRAND GUIDE / VERSION 1.1

Know every position, every day.

The single source of truth for the GoodStream brand. Verbal identity, visual identity, and application system. This document supersedes all prior brand materials in circulation.

CONTENTS

Every section in this document.

A working handbook for every GoodStream designer, engineer, writer, salesperson, and vendor. If you produce anything that carries the name, start here.

SECTION 00

Brand at a Glance.

Who we are, what we stand for, who we sell to, and the single sentence that keeps every team aligned.

POSITIONING

Real-time portfolio intelligence for venture capital.

Raw data in, aligned numbers out. GoodStream turns messy, delayed portfolio data into decision-ready truth - so VCs know every position, every day, without a spreadsheet scramble.

"Know every position, every day."

CANONICAL TAGLINE - VERBAL SIGNATURE OF THE BRAND

The five pillars

Everything we say traces back to one of these. If it doesn't, it doesn't ship.

PILLAR	WHAT IT COMMITS US TO
Specialized over general	We built extraction agents for private capital specifically. General-purpose AI is not the answer.
Proof, not promises	Every claim has a source document behind it. Every number is auditable to the artifact.
Truth over theater	Show the real number, even when it's uncomfortable. No vanity metrics. No hand-waved ranges.
Collapse time to value	Shocking value in a shockingly short window. First value in minutes, full portfolio reconciled inside days - not quarters. The onboarding is the pitch.
Iterative flywheel	The winner in our space is the one who hears, builds, and ships back to the customer fastest. Every feedback loop is instrumented. Every request gets a response. Velocity is the moat.

Ideal customer

Two ICP segments, both active. We are not deflecting anyone in our addressable market today - each segment is worked with a distinct motion.

ICP 1 - VENTURE (PRIMARY)

APPROX. 2,000 FIRMS IN THE US

Who: VC funds managing 25+ portfolio companies.
Buyer persona: the CFO / COO / head-of-ops / platform lead. They feel the weekly pain of reconciling the portfolio number.
Budget + authority: sits with the GP, not always with the ops lead. We equip the ops lead to build the internal case; we stay in front of the GP for sign-off.
Social reach: generally low. Decisions are made in-house, not broadcast. We earn them with time-to-value proof, not virality.

ICP 2 - ANGEL (CO-PRIMARY)

APPROX. 20,000 INDIVIDUALS IN THE US

Who: active angels with 10+ investments - the point where the spreadsheet starts to break.
Buyer persona: the angel themselves. Need, budget, and authority in one person. Lowest-friction deal cycle we have.
Why it matters strategically: many have real social followings. They buy GoodStream for themselves, then pull other angels and funds toward us. They are our first compounding distribution channel.
Status: we are actively experimenting with this segment, not deflecting it.

One-sentence north stars by audience

Use verbatim. Do not remix in campaigns without brand review.

MASTER, ALL AUDIENCES

Real-time portfolio intelligence for venture capital.

PARTNER / GP

Know every position, every day - without waiting on your team to assemble the number.

FINANCE / PLATFORM LEAD

Replace the quarterly scramble with a reconciled, sourced portfolio view you can trust on day one of the month.

ANGEL INVESTOR (10+ INVESTMENTS)

Your spreadsheet is breaking. GoodStream is the fastest way to own every position you hold - live, sourced, and shareable - without hiring an analyst.

LP / INVESTOR AUDIENCE

Portfolio reporting that closes the gap between the deal and the number.

Brand personality

Clear · Precise · Operator-grade · Confident, not cocky · Substance over polish · Warm at close range, serious at distance

Brand as a product decision

The name, the logo, the voice, and the color carry one job: to signal fit for purpose. A GP opens an email, lands on a page, or flips to a slide; within one glance, they should conclude "this is built for me, not for everyone." Everything in this document is in service of that single moment.

SECTION 01

Logo System.

The W3 wordmark is GoodStream's signature. Two colors, one family, one tone of voice. Everything here is about using it correctly and consistently - at every size, on every background.

01.01 - PRIMARY WORDMARK

The signature.

Two words, one brand. "Good" in navy, "Stream" in GoodStream Blue. The two-color treatment is the default expression and carries the balance of grounded + live that the product stands for.

GoodStream

PRIMARY WORDMARK / LIGHT BACKGROUNDS / TWO-COLOR

PROPERTY	SPEC
Family	Wordmark (W3)
Type source	Inter Bold 700 (outlined to curves for perfect reproduction)
Case	GoodStream (title case, single compound word)
Colors	#1A1F2E GoodStream Navy + #015AEB GoodStream Blue
File formats	SVG (master), PNG (32/48/64/96/128/256/512px heights), PDF
Asset name	`wordmark-primary.svg`
Native aspect	5.487:1 (viewBox 783.6 × 142.8)

01.02 - BACKGROUND LOCKUPS

Six approved ways to place the mark.

Use the two-color wordmark wherever a white or near-white surface allows it. Move to a single-color variant whenever the surface forces it: photography, navy or blue surfaces, print without color fidelity, or a single-ink constraint.

GoodStream

wordmark-primary — Light BG • Two-color

GoodStream

wordmark-light-bg — Soft-white BG • Two-color

GoodStream

wordmark-dark-bg — Navy BG • White

GoodStream

wordmark-on-blue — Blue BG • White (knockout)

GoodStream

wordmark-mono-navy — Light BG • One-color navy

GoodStream

wordmark-mono-black — Print-safe • One-color black

When to use which

SCENARIO	VARIANT

Product UI, website, marketing surfaces, email signatures	wordmark-primary (two-color)
Dark mode UI, deck covers, social banners, hero sections	wordmark-dark-bg (white)
Branded blue surface - sticker, T-shirt, CTA panel	wordmark-on-blue (white, knockout)
Single-ink print, low-fidelity reproduction, fax/bw docs	wordmark-mono-black
Partner co-brand lockup where blue would clash	wordmark-mono-navy
Photography or textured background	wordmark-dark-bg over a navy overlay (never layered directly)

01.03 - GS MONOGRAM / FAVICON SYSTEM

The compact mark.

When there isn't room for the full wordmark, the GS monogram steps in. Two characters, rounded-square container, optically centered for square aspect ratios. Use for favicons, app icons, social profile photos, event badges, and anything that must read at 32 pixels square.

PRIMARY / BLUE | NAVY | INVERT / BLUE | INVERT / NAVY | MONO / BLACK

Favicon spec

PROPERTY	SPEC
Canvas	120 × 120 viewBox, 21.7% border-radius (rx=26)
Monogram	G + S, same glyph source as wordmark, optically centered
Rendered sizes	16, 32, 64, 180 (apple-touch), 256, 512, 1024
Default brand asset	`favicon-gs-blue.svg`
Dark-app asset	`favicon-gs-navy.svg`

Selection rule

Favicons pick themselves based on the host surface. Never improvise - if a surface would clash with all five, revert to the full wordmark.

DO

Use the Blue favicon on white/light surfaces (docs, browsers, Google Drive).
Use the Navy favicon on a premium

DON'T

Recolor the monogram outside of the five approved variants.
Use the full wordmark where only 32×32 pixels are available - always the

dark UI (Brief app, dark-mode product). Use the Invert variants when paired with a dense colored lockup that already contains GoodStream Blue.

monogram.
Lock the monogram inside a circle or hex - the square with 26px corner radius is canonical.

01.04 - CLEAR SPACE & SIZING

Minimum clear space.

Minimum clear space on all four sides equals the cap-height of the letter G. Nothing - other logos, text, photography, or UI elements - may violate that perimeter. Closer is better than further; don't over-breathe.

CLEAR SPACE - MINIMUM "G" CAP-HEIGHT

GoodStream

Size ramp

GoodStream

2.6 in / 250 px - Print, deck covers

GoodStream

1.5 in / 144 px - Web headers, email

GoodStream

0.8 in / 76 px - Footers, email signature

Wordmark minimum: 72 px wide digital, 0.75 in / 19 mm wide in print. Below this size, use the GS monogram instead.

Monogram minimum: 16 × 16 px digital, 0.25 in / 6 mm in print.

01.05 - MISUSE

Nine ways to break the mark.

If you see the wordmark expressed any of these ways, it's wrong. Fix it or replace the asset with one of the approved lockups.

GoodStream

Do not stretch or distort.

GoodStream

Do not skew, italicize, or rotate.

GoodStream

Do not tilt or angle the wordmark.

GoodStream

No drop shadows, bevels, or 3D effects.

GoodStream

No outlines or glow effects.

GoodStream

Do not place on busy or textured backgrounds.

GoodStream

Do not place navy variant on blue (poor contrast).

GoodStream

Do not recolor with non-brand colors.

Goodstream

Do not re-typeset in a different font.

BEFORE YOU PLACE IT

Check contrast with the background. If the wordmark would fail WCAG 2.1 AA (4.5:1 against text-sized elements), use the dark-bg variant instead.

IF IN DOUBT

Ask the brand owner (Keith Smith) before shipping. The cost of one Slack message is small; the cost of a misused mark in market is large.

01.06 - CO-BRAND & PARTNER LOCKUPS

How we pair with others.

Partner lockups, integration badges, and customer slide templates follow a small set of composition rules. Get these wrong and we look small; get these right and we look peer-level to the most established names in the stack.

Horizontal co-brand

GoodStream | Partner Name

Horizontal co-brand — Equal optical weight • Vertical divider

Rules

- **Divider**. A 1-pixel vertical border-soft line with equal padding on both sides. Never a plus sign, ampersand, or "x".
- **Equal optical weight**. The partner mark's visual mass must match the GoodStream wordmark, not match its pixel height.
- **Order**. GoodStream left when we host or integrate into the partner; GoodStream right when the partner is the primary host.
- **Color family**. Use wordmark-primary or wordmark-mono-navy. Never wordmark-on-blue in a co-brand unless the partner's mark is also white.
- **Clear space**. Apply the G cap-height rule to both marks. If the partner has its own clear space standard, use the larger.

When not to co-brand

Marketing surfaces only. Never place a co-brand lockup inside the product UI, in email signatures, or on invoices. The GoodStream mark stands alone in every operational surface.

SECTION 02

Color.

A tight palette, built for a financial surface. One brand color pulls focus. Semantic colors speak plainly. Data-viz colors coexist. Nothing decorative.

02.01 - PRIMARY PALETTE

One brand blue.
One grounding navy.

GoodStream Blue carries action. GoodStream Navy carries substance. No other color carries the brand. The supporting palette exists to make these two work harder.

GoodStream Blue
#015AEB
--gs-blue

GoodStream Navy
#1A1F2E
--gs-navy

Supporting neutrals

Deep Blue
#2F5086
--gs-deep-blue

Midnight Navy
#1D2530
--gs-midnight-navy

Soft White
#F9FAFB
--gs-soft-white

Light Neutral
#F5F5F5
--gs-light-neutral

Interactive accents

Blue Tint
#E6ECFE
--gs-blue-tint

Gray-accent (Blue)
#B4D0FD
--gs-gray-accent

Border Soft
#E5E7EB
--gs-border-soft

02.02 - SEMANTIC

Three meanings. Three colors.

Semantic colors only ever mean status. Never use them decoratively - doing so teaches the UI to lie. A green element in the product always means "healthy / positive / complete." Amber always means "caution / pending." Red always means "error / risk."

Success
#00A971

--gs-critical

Accessibility

PAIR	CONTRAST	WCAG 2.1 AA
Navy #1A1F2E on White	15.8 : 1	Pass (AAA for body, AAA for large)
Blue #015AEB on White	8.2 : 1	Pass (AAA for body, AAA for large)
White on Blue #015AEB	8.2 : 1	Pass (AAA for body, AAA for large)
White on Navy #1A1F2E	15.8 : 1	Pass (AAA)
Deep Blue #2F5086 on White	6.5 : 1	Pass (AA body, AAA large)
Gray-accent #B4D0FD on Navy	7.1 : 1	Pass (AA body, AAA large)

Contrast ratios computed at canonical hex values, sRGB space. When in doubt, verify at webaim.org/resources/contrastchecker.

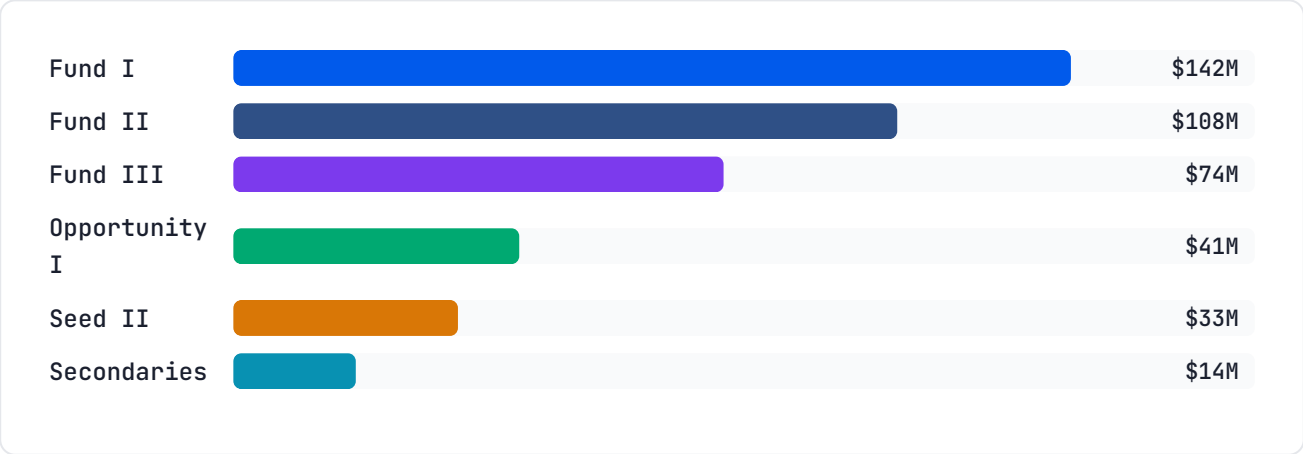
02.03 - DATA VISUALIZATION

Eight colors for charts.

GoodStream is a portfolio intelligence product - charts are the unit of value. This eight-color palette is ordered by prominence. Always assign colors in sequence; never skip to chart-5 for aesthetics. Perceptually separated, accessible on white and on soft-white, usable in print.

Chart 1 #015AEB --gs-chart-1	**Chart 2** #2F5086 --gs-chart-2	**Chart 3** #7C3AED --gs-chart-3	**Chart 4** #00A971 --gs-chart-4
Chart 5 #D97706 --gs-chart-5	**Chart 6** #DC2626 --gs-chart-6	**Chart 7** #0891B2 --gs-chart-7	**Chart 8** #B4D0FD --gs-chart-8

Specimen



02.04 - RULES

How to use color.

DO

Pull focus with a single accent color per view.

Reserve GoodStream Blue for calls to action and primary interactive elements.

Default to Soft White backgrounds. Default to Navy body text.

Follow the chart palette order - chart-1 first, never by "feel."

Treat semantic colors as product status only.

DON'T

Use gradients on GoodStream Blue (the brand color is flat by design).

Use warm accents (orange, amber, red) decoratively outside their semantic meaning.

Introduce new colors "because the chart needed one more."

Tint GoodStream Blue below 20% for backgrounds - use the defined Blue Tint instead.

Combine more than 3 semantic colors in a single view.

Backgrounds by context

SURFACE	BACKGROUND	BODY TEXT	ACCENT
Website (default)	Soft White #F9FAFB	Navy #1A1F2E	Blue #015AEB
Deck (default)	White #FFFFFF	Navy #1A1F2E	Blue #015AEB
Deck (cover / section breaks)	Navy #1A1F2E	White #FFFFFF	Gray-accent #B4D0FD
Email (plain body)	White #FFFFFF	Midnight Navy #1D2530	Blue #015AEB (links only)
Product UI (light mode)	Soft White #F9FAFB	Navy #1A1F2E	Blue #015AEB

Brief dashboard	Charcoal #0B0E11	Cream #F1E7CF	Gold #C9A84C

SECTION 03

Typography.

One family for everything you read. One monospace family for everything you measure. No exceptions - no display fonts, no "brand script," no decorative weights.

03.01 - TYPE FAMILIES

Inter + JetBrains Mono.

Inter is our sans - for everything human. JetBrains Mono is our mono - for everything numerical. Together they cover display, body, UI, and data. Two families total.

Inter - Display & Body

Weights in use: 400 Regular, 500 Medium, 600 Semibold, 700 Bold, 800 Extrabold.
Variable font, hinted for UI. Supports tabular figures via `font-feature-settings: "tnum" 1`.
Licensed under the SIL Open Font License. Self-host or use Google Fonts CDN.

JetBrains Mono - Numerics, Code, Labels

Weights in use: 400 Regular, 500 Medium, 700 Bold.
Tabular by default. Apache 2.0 license. Self-host or use Google Fonts CDN.
Use for: financial tables, KPI cards, chart axes, tickers, captions, inline code.

Fallback stack

```
/* CSS fallback stacks */
--gs-font-display: 'Inter', 'SF Pro Display', system-ui, sans-serif;
--gs-font-body:    'Inter', system-ui, sans-serif;
--gs-font-mono:    'JetBrains Mono', 'SF Mono', Menlo, monospace;
```

Performance budget. Preload only the weights listed above. Never ship a full Inter or JetBrains file unsubsetted - this adds 200KB per pageview for zero benefit.

03.02 - TYPE SCALE

The modular scale.

One 1.25 modular ratio for the whole brand. Eight steps, body anchored at 16px / 1rem. Use the tokens - never handpick a pixel value outside this ladder.

DISPLAY / 56	**Real-time.**
H1 / 40	**Know every position.**
H2 / 32	**Portfolio intelligence, built for VCs.**
H3 / 24	**Raw data in, aligned numbers out.**
LEAD / 18	GoodStream turns messy portfolio data into decision-ready truth - every day, in one place.
BODY / 16	Every claim has a source document behind it. Every number is auditable to the artifact. When a GP asks "where did this come from?" the answer is always visible, always one click away.
SMALL / 14	Source: Aumni API, 2026-04-12T08:31:19Z. Reconciled against Docsend capcall, Affinity contact notes.
CAPTION / 12	SECTION 03 / TYPOGRAPHY / PAGE 19

03.03 - JETBRAINS MONO IN USE

Numerics lock to the grid.

Anywhere a number carries meaning - portfolio valuations, ownership percentages, fund IRRs, deal counts, dashboard KPIs - it renders in JetBrains Mono with tabular figures. This is non-negotiable. Proportional figures in a financial UI are a lie in disguise.

PORTFOLIO NAV	ACTIVE POSITIONS	FUND IRR	UNFUNDED CAPITAL
$412.8M	147	22.4%	$78.2M
+4.2%	+3	+0.3%	-2.1%

Tabular figures rule

```
/* apply to every numeric element */
.num, .kpi-value, td.num, .chart-axis {
  font-family: var(--gs-font-mono);
  font-variant-numeric: tabular-nums;
  font-feature-settings: "tnum" 1, "zero" 1;
}
```

Caption & label style

EYEBROW	01.02 - LOGO SYSTEM
INLINE CODE	`const portfolio = await goodstream.fetch({ fundId: 'FUND-II' });`
DATA LABEL	PORTFOLIO NAV / Q1 2026 / RECONCILED

03.04 - RULES

How to set type.

DO

Use **Inter** for everything human. One family.

Use **JetBrains Mono** for every number, ticker, or line of code.

Set body at 16px. Line-height 1.55 for paragraphs.

Tight letterspacing (-0.02em to -0.035em) on display sizes; loose (0.06em to 0.14em) on mono eyebrows.

Enable `font-variant-numeric: tabular-nums` everywhere a number is shown.

DON'T

Pair another sans-serif alongside Inter (no Plus Jakarta, IBM Plex, Roboto).

Use italic bold weights - use italic regular or italic medium.

Use SYSTEM fonts in marketing surfaces - always load Inter.

Set body copy at sizes below 14px. Below 14 = caption only.

Introduce a "brand script" or decorative headline face.

Paragraph style

CONTEXT	SIZE	LINE-HEIGHT	WEIGHT	MAX WIDTH
Body paragraph (web)	16px	1.55	400	640px
Body paragraph (print)	11pt	1.5	400	6.5in
Lead paragraph	18px	1.5	400	560px
Caption	12px	1.4	500	-
Deck headline	40-56px	1.05	800	9in

SECTION 04

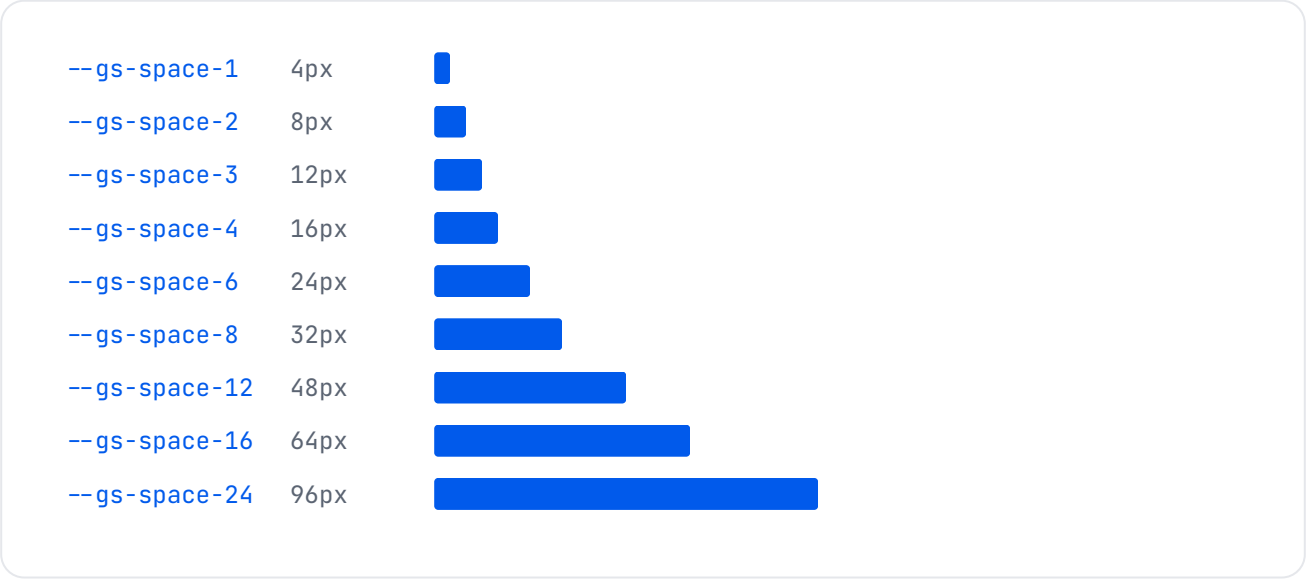
Spatial System.

Space, shape, light, and motion. These tokens decide how structured and how precise everything feels. Use them - never hand-tune.

04.01 - SPACING SCALE

A 4-pixel spacing grid.

Every gap, padding, margin, and inset snaps to a 4-pixel grid. The nine tokens below cover 99% of layouts. If you need something different, you probably need to rethink the layout, not add a token.



04.02 - RADIUS, ELEVATION & MOTION

Shape & light.

Radius

sm / 4px

md / 8px

lg / 12px

pill

TOKEN	VALUE	USE
--gs-radius-sm	4px	Input fields, tags, small chips
--gs-radius-md	8px	Buttons, primary containers
--gs-radius-lg	12px	Cards, modals, large panels
--gs-radius-pill	9999px	Pills, avatars, status chips

Elevation (shadow)

shadow-sm

shadow-md

shadow-lg

Motion

TOKEN	VALUE	USE
--gs-duration-fast	150ms	Hover, focus, small acknowledgements
--gs-duration-base	250ms	Panel entry/exit, page transitions
--gs-duration-slow	400ms	Large layout reflows, hero choreography
--gs-ease-out	cubic-bezier(0.16, 1, 0.3, 1)	Default entry curve

`--gs-ease-in-out`	cubic-bezier(0.4, 0, 0.2, 1)	Symmetric transitions

Respect `prefers-reduced-motion`. If set, collapse duration-base/slow to 0ms and keep only duration-fast.

SECTION 05

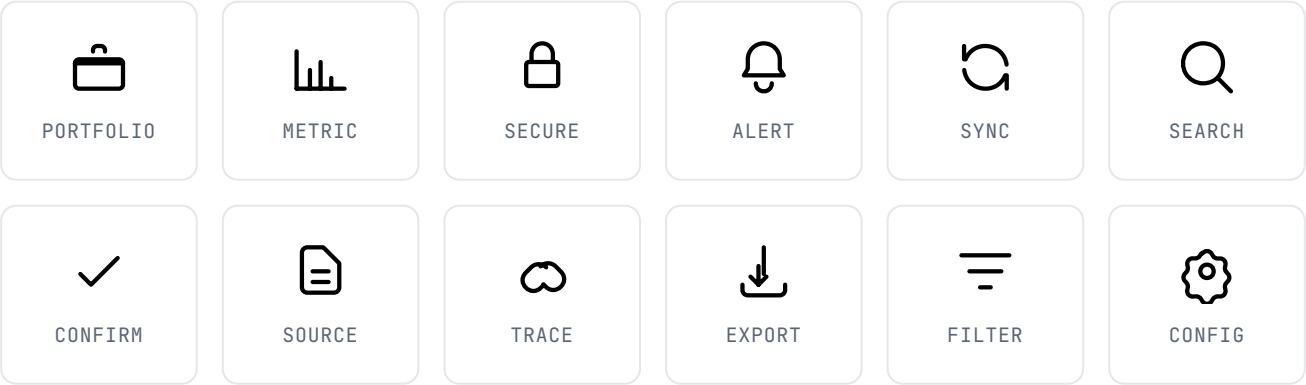
Iconography & Imagery.

Icons speak in short sentences. Photography speaks in long ones. Both should look like they were chosen by someone who knows the industry.

05.01 - ICON SYSTEM

Line, not filled.

Stroke-based. 24×24 grid. 1.6px stroke. Square caps, round joins. Use Heroicons (MIT) as the default set and only depart when a specific concept is missing.



Icon rules

DO

Stroke-based, 1.6px, rounded joins.

Match color to surrounding text by default (`currentColor`).

Use the navy for all interface icons; use the blue only when the icon is an active/selected state.

DON'T

Introduce filled or 3D icon sets.

Mix multiple icon libraries in one surface.

Apply brand blue to every icon - pull-focus by scarcity, not density.

05.02 - IMAGERY & ILLUSTRATION

Three image moods. No stock cliches.

GoodStream imagery falls in three buckets. When in doubt, choose less. Never use boardroom handshake stock, racing-rowboat stock, or chess-piece stock. If it looks like it came from a 2014 SaaS template, it's wrong.

DATA CHART ENVIRONMENT

EDITORIAL PORTRAIT

STUDIO PRODUCT SHOT

MOOD	USE FOR	STYLE CUES
Data / Chart	Product marketing, feature pages, dashboard previews	Navy-to-blue gradient surfaces, charts as hero, real numbers, reconciled timestamps visible
Editorial	Team / about / customer story / investor profile	Natural light portraiture, real environments (offices, whiteboards), no over-styling, muted tones
Studio	Press / deck covers / press kit	Clean soft-white seamless, single point of focus, low contrast, no colored gels

Illustration

GoodStream does not use mascot illustration or spot illustration. Any illustrative surface that appears in the brand is abstract - lines, charts, flows - and renders directly from product output. The product's real chart output is the illustration.

SECTION 06

Voice & Tone.

We sound like a sharp operator who knows what's broken and has already started fixing it. We don't bluff, overpromise, or hide behind vocabulary.

06.01 - WE ARE / WE ARE NOT

The shape of our voice.

Six attributes define the voice. Each is paired with its negation. If a piece of copy drifts into the right column, it stops sounding like GoodStream.

WE ARE	WE ARE NOT
Direct. Lead with the answer. "The number is X." "The bottleneck is Y."	Not hedging. "We think this might potentially possibly help some firms maybe..."
Specific. Named tools, named workflows, real numbers, real timestamps.	Not abstract. "Transform your portfolio operations." "Unlock insights."
Operator-grade. We know how a fund actually closes a quarter. We use the actual terms.	Not consulting-speak. "Drive alignment," "inflect growth," "level-set."
Confident. We say what works, what doesn't, and what we built.	Not arrogant. Never "obviously," "simply," or "just do X."
Technically honest. Our product extracts and reconciles - we say so precisely.	Not "AI-powered magic." Never "revolutionary" or "paradigm-shifting."
Warm at close range. Person-to-person writing uses names, context, and plain English.	Not formal. We don't "respectfully request." We "ask."

"We're not the only product in this space - we're the only one that treats the portfolio number like it matters every day."

INTERNAL FRAME - KEEP THIS AS THE LITMUS TEST

06.02 - TONE BY CONTEXT

Same voice. Different volume.

The voice never changes. The tone adjusts for stakes. A first cold email is lower-heat than an internal slack thread with customers on the line. These are the defaults.

CONTEXT	TONE	DO	DON'T
Cold outreach	Respectful, punchy	Lead with pain. Name one workflow. Offer one next step.	Don't open with "I hope this finds you well." Don't attach the deck in the first email.
Follow-up	Direct, low-friction	Recall the exact conversation. Offer to deepen or move on.	Don't "just circling back" or "bumping this."
Demo / Pitch	Confident, substantive	Lead with a real workflow. Show the product. Let the GP steer.	Don't feature-tour. Don't "vision slide" for five minutes.
Investor update	Unfiltered, numbers-first	Lead with the number that matters. Then context. Then the ask.	Don't narrate around it. Don't bury the miss.
Customer Slack	Warm, specific, fast	Use the person's first name. Reply to the specific thread.	Don't send canned responses. Don't route to a ticket.
Product UI copy	Plain, scannable	Say what the user did or can do. Verbs first.	Don't use personality or jokes in UI microcopy.

06.03 - FIVE MESSAGING PILLARS

Everything we say maps to one of these.

1. Specialized over general.

We built extraction agents specifically for private capital - cap tables, SAFEs, term sheets, investor updates, board decks. General-purpose AI is not the answer for this domain. Precision-tuned, domain-specific pipelines are. When we talk about the product, we lead with the specialization.

2. Proof, not promises.

Every number is sourced to the artifact that produced it. Every claim cites a document. Every demo shows the real portfolio, not a staged one. When we tell a prospect we can reconcile their fund in hours, we prove it inside hours.

3. Truth over theater.

We show the real number even when it's uncomfortable. No vanity metrics. No hand-waved ranges. No "up and to the right" slides that don't survive a zoom-in. If a portfolio's underperforming, the product says so. If an integration is still in beta, the page says so.

4. Collapse time to value.

Our core design principle. First value in minutes, full portfolio reconciled inside days - never quarters. Onboarding is not a phase; it is the pitch. Every feature, email, landing page, and demo is scored against one question: how fast does this get the customer to "holy shit, that's already done"? If it delays that moment, it ships later or doesn't ship.

5. Iterative flywheel.

The winner in portfolio intelligence will be whoever hears customers, builds, and ships back to them fastest. We instrument every feedback loop - sales calls, support threads, usage telemetry, NPS - and we close those loops in public. Every customer

request gets a response; the best requests become features the next week. Velocity compounds; it becomes the moat.

06.04 - TERMINOLOGY

Words we use.
Words we don't.

Approved terminology

TERM	WHY WE USE IT
Portfolio intelligence	Our category. Primary external language.
Specialized extraction agents	Our technical differentiator. Beats "AI" and "LLM" everywhere externally.
Reconciled / reconciliation	The verb we own. The product reconciles.
Aumni	Integration partner. Always A-U-M-N-I. Never "Omni."
Fund admin / portfolio ops / platform	Our primary buyer titles. Use precisely.
Sourced to the artifact	Every number has a document of origin. This is the evidence standard.
Limited early access / General Availability May 1, 2026	Current status. Do not say "live" without qualifier until May 1. Never use the abbreviation "GA" externally.

Banned terminology

NEVER	USE INSTEAD
AI-powered / AI-driven / revolutionary AI	Specialized extraction agents
Game-changer / paradigm shift / unlock	(say what the thing does)
Seamless / effortless / magic	(a seam that's been done well is "reconciled")
Leverage (as verb for "use")	Use / run / apply

GDPR-compliant / CCPA-compliant / ISO-certified	Working toward GDPR/CCPA alignment; ISO 27001 scope defined
SOC 2 compliant / SOC 2 certified	SOC 2 Type II audit in progress
K-1	(we don't do K-1 work. period.)
Omni (misspelling of Aumni)	Aumni

06.05 - MESSAGING GUIDELINES

Twenty-two guidelines.

Evolving, not fixed. Each one exists because we broke it once. If you find yourself wondering whether it applies - apply it, then tell the owner so we can sharpen the rule.

1. Spell **Aumni** A-U-M-N-I. Never Omni. Firing offense.
2. Say "SOC 2 Type II audit in progress," not "SOC 2 compliant."
3. Qualify all GDPR/CCPA/ISO language with "working toward" or "in scope."
4. Always pair SOC 2 mentions with "LLMs never train on your data."
5. Never mention K-1 workflows. We don't do that.
6. Lead with the reader's pain - not GoodStream's capabilities.
7. Subject lines describe the message. Never contain the recipient's name.
8. Salutation is "Hi Name," not "Dear Name" or "To Whom It May Concern."
9. Canonical signature is everything from -- down; sender types their own sign-off above it.
10. Email body is HTML, never wrapped in `<![CDATA[...]]>`.
11. Every outbound where we expect a response creates a BOLO (internal rule).
12. Equity/option mentions include "subject to Board approval + separate stock option agreement."
13. Never say "pre-launch" or "7 active pilots." We are live in limited early access, General Availability May 1, 2026. Never abbreviate it as "GA" externally.
14. Use venture capital as the 2026 master positioning language. Reserve "private capital" for 2027 expansion.
15. Numbers in a product or marketing surface render in JetBrains Mono tabular figures.
16. No emoji in formal external communications. One small emoji is fine in internal Slack.
17. Never use emdash (-). Always standard dash (-).
18. Never use "just" to minimize difficulty ("just install..." "just link...").
19. Use calendar links only from the three approved routes (30 / 45 / 60 min).
20. Password-protect every GitHub Pages publish that contains named customer or investor content.
21. Generate a new DocSend link per-company every time the deck goes out.
22. When citing a number, show the source timestamp and origin (e.g., "per Aumni API, 2026-04-12 08:31 UTC").

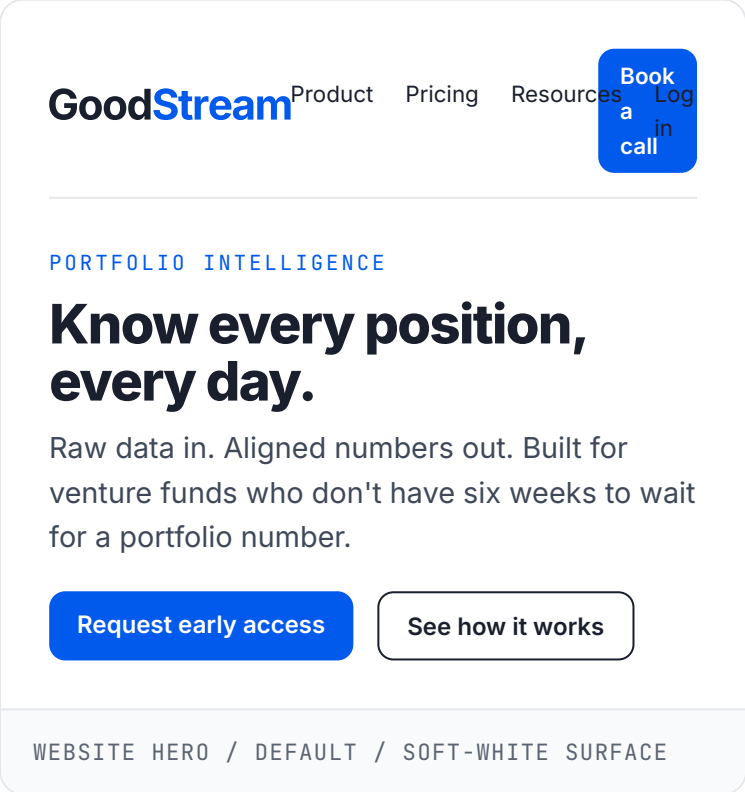
SECTION 07

Applications.

The brand, rendered into the surfaces it actually lives on. Use these as reference mockups - and as a library of do's and don'ts.

07.01 - MARKETING SURFACES

Website hero & deck cover.



WEBSITE HERO / DEFAULT / SOFT-WHITE SURFACE

DECK COVER / INVESTOR & CUSTOMER / NAVY SURFACE

Rules

- Website hero always uses wordmark-primary (two-color) on soft-white.
- Deck cover always uses wordmark-dark-bg (white) on navy.
- Headline font: Inter Extrabold 800. Leading 1.05. Letter-spacing -0.03em.
- One eyebrow, one headline, one lead, one primary CTA, one secondary CTA. No more.
- Deck cover footer carries confidentiality marker for investor and partner decks.

07.02 - EMAIL & SOCIAL

Email signature & LinkedIn banner.

(Keith types his own "Best, / Keith" above this block.)

GoodStream

Keith Smith
Co-Founder & CEO, GoodStream
goodstream.com Book a call

CANONICAL SIGNATURE / EVERYTHING FROM THE DASHES DOWN

GoodStream
Real-time portfolio intelligence for venture capital.
GOODSTREAM.COM / LIMITED EARLY ACCESS

LINKEDIN BANNER / FOUNDER & COMPANY / 1584×396

Email signature spec

```
<!— canonical HTML signature - EVERYTHING FROM THE DASHES DOWN —>
--
<img src="wordmark-primary.png" height="22">
Keith Smith
Co-Founder & CEO, GoodStream
goodstream.com / Book a call
```

Only the block from -- down is canonical. Keith manually types "Best, / Keith" above the dashes when needed; other senders type their own sign-off. **No phone number. No awards. No logos beyond the wordmark.** Use the primary wordmark PNG at 22px height (44px @2x). The entire canonical block fits inside a fixed 320px width.

07.03 - BUSINESS CARD & FAVICON SET

Print & browser.

Business card / 3.5 × 2 in / 350gsm uncoated Mohawk Superfine (ultrawhite, eggshell) / single-pass offset, no foil, no emboss.

Favicon set in situ

BROWSER TAB

DARK SURFACE

ON WHITE CARD

APP ICON / BRIEF

SINGLE-INK PRINT

SECTION 08

Brief. Sub-Brand.

The daily portfolio intelligence brief uses a deliberate sub-brand - premium, editorial, dense. Bloomberg.com vs. Bloomberg Terminal. Same company, two faces.

08.01 - RELATIONSHIP

Master brand.
Brief sub-brand.

GoodStream-the-product is approachable, clean, and modern. That is the face the market meets. Brief-the-surface is premium, editorial, and dense - because the people who open it daily are operators, not buyers.

	MASTER BRAND	BRIEF SUB-BRAND
Audience	Prospects, buyers, investors, partners	Daily users (GPs, fund ops)
Surfaces	Website, deck, marketing, email	Dashboard, Brief morning email, ops views
Palette	Blue + Navy + Soft White	Charcoal + Gold + Cream
Type	Inter + JetBrains Mono	Plus Jakarta Sans + JetBrains Mono
Logo	W3 wordmark (GoodStream)	"Brief" wordmark + GS monogram co-sign
Vibe	Live, warm, modern	Editorial, quiet, dense

BRIEF / APRIL 20, 2026 / 07:00 ET

Portfolio NAV moved +2.1% overnight. Fund II led, driven by Everbright and Cato.

Reconciled 06:58 ET / 412 positions / 14 funds goodstream.com/brief

08.02 - BRIEF TOKENS

Colors & type for Brief.

Palette

Brief Background
#0B0E11
--brief-bg

Brief Gold
#C9A84C
--brief-gold

Brief Cream (type)
#F1E7CF
--brief-cream

Brief Amber
#D97706
--brief-amber

Brief Green
#059669
--brief-green

Brief Violet
#7C3AED
--brief-violet

Shared with master brand

GoodStream Blue
#015AEB
--brief-blue

Semantic Critical
#DC2626
--brief-red

JetBrains Mono
#F1E7CF
(shared)

Type

ROLE	FAMILY	NOTE
Display / Body	Plus Jakarta Sans	Weights 500 / 600 / 700 - Brief-only
Numerics	JetBrains Mono	Shared with master brand

The type decision for Brief is intentional - Plus Jakarta Sans reads as more editorial and quiet than Inter. It creates a clear "surface identity" when a user is in Brief vs. anywhere else in the GoodStream system.

08.03 - USAGE BOUNDARIES

When to use which.

MASTER BRAND

Marketing site and landing pages
Deck (investor, customer, partner)
Cold outreach email
Onboarding email
Business cards, event collateral
Product marketing and press kit
Any surface a prospect sees before signing

BRIEF SUB-BRAND

The Brief morning email
The Brief dashboard / daily ops UI
Customer-facing portfolio snapshot (after login)
Internal ops tooling
Weekly digest for engaged customers
Any surface a daily user lives inside

Hard rules

- Never mix master-brand type (Inter) and Brief type (Plus Jakarta) in the same surface.
- Never use Brief gold (#C9A84C) in master-brand marketing surfaces.
- GoodStream Blue is the one color allowed to cross - it appears in both systems identically.
- JetBrains Mono is the one type family allowed to cross.
- The GS monogram may appear as a co-sign element in Brief (subtle, bottom-right footer only). The full wordmark never does.

SECTION 09

Governance.

Brand is a product. It has an owner, a release cycle, a request path, and a changelog. This is how it gets maintained without drifting.

09.01 - OWNERSHIP & PROCESS

Who owns it.
How to change it.

ROLE	PERSON	SCOPE
Brand owner	Keith Smith (CEO)	Final call on logo, colors, type, voice, and any departure from the guide
Brand operator	Claude (CoS / Brand ops)	Daily application, asset generation, draft review, compliance audits
Design partner	Claude Design (claude.ai/design)	Visual expansion, concept iteration, UI/UX input
Brand voice audit	brand-voice:brand-voice-enforcement skill	Content compliance check before publish

Change process

1. **Raise**. Anyone can raise a change request (new asset, new color, new rule) by Slack DM to Keith or GitHub issue on `keith-GS/brand`.
2. **Draft**. Claude drafts the proposed change including: what changes, why, impact surface inventory, and rollout order.
3. **Approve**. Keith approves or requests changes. No asset ships without CEO sign-off.
4. **Version**. Increment the version number in this document's cover: minor for tokens, major for new pillar or logo change.
5. **Rollout**. Claude executes the rollout across the priority surface list (see next page).
6. **Announce**. Change logged in the appendix, posted to #brand in Slack with a before/after.

What requires a version bump

CHANGE	BUMP

New color token, new type size, spacing token	Minor (1.1 → 1.2)
New wordmark variant, new favicon, new semantic color	Minor
Primary wordmark change, primary brand color change	Major (1.x → 2.0)
Voice / tone rewrite	Major
Typo, clarification, or rewording without rule change	Patch (1.1 → 1.1.1)

09.02 - SURFACES INVENTORY

Every place the brand lives.

Authoritative registry of every surface where the GoodStream brand renders. Each row shows current compliance with v1.1. This is a living inventory - the MIMB dashboard panel brand-compliance mirrors the same data and is the operational source of truth.

Legend: `GREEN = compliant with v1.1` `YELLOW = needs update` `RED = non-compliant, active risk`

Where this guide itself lives (distribution channels)

CHANNEL	ROLE	OWNER	LAST SYNCED	STATE
MIMB dashboard panel - `dashboard/brand/brand-guide/latest.html`	**Sole source of truth** (local, Cowork-owned)	Claude	Apr 21 2026	GREEN
GoodStream Brain project (Claude.ai shared project)	Mirror - every Claude session uses this as context	Claude	Apr 21 2026	GREEN
Slack #all-goodstream announcement + PDF attachment	One-time static reference for team	Claude	Apr 21 2026	GREEN
Internal engineering repo - `tokens.css` + `tokens.json`	Machine-readable token bundle for web + product	Engineering	Apr 21 2026	YELLOW

API / developer docs (if public)	T4	Engineering	Not created	RED

09.03 - ROLLOUT PLAN (V1.1 CUTOVER)

Cutover is today.

No phased rollout. No calendar. Claude executes every tier today, surface by surface, with GREEN confirmed on the MIMB brand-compliance panel before the day ends. The tier SLAs on the inventory page (48h / 7d / 30d / 90d) describe the ongoing maintenance cadence after cutover - they do not gate the cutover itself.

Tier 1 - Public-facing (ship first)

- goodstream.com - push tokens.css, swap favicon, update hero headline & OG image
- Primary investor deck - rebuild cover + master pages on v1.1 template
- LinkedIn company page - banner, tagline, about, logo (1200×1200)
- LinkedIn founder profile - banner, headline, about section
- X / Twitter (company + founder) - v1.1 avatar + banner
- Gmail signatures across all @goodstream.com addresses
- Calendar scheduling pages - meeting branding + banner
- Brief sub-brand site - charcoal + gold palette on shared tokens base

Tier 2 - Sales & outbound

- Partner deck, sales/demo deck, one-pager - rebuilt on v1.1 template with new pillars copy
- Angel-segment landing page - net new surface, shipped before first angel campaign
- Outbound email templates - voice v1.1 + new messaging pillars
- Common Room + Artisan outreach templates - sync to v1.1

Tier 3 - Legal & contract templates

- NDA, MSA, DPA, SOW, proposal templates - rebrand headers/footers, sync language to v1.1
- Invoice template - Mercury + Stripe branding

Tier 4 - Internal tools & long-tail

- Slack / Notion / Workflowy / GitHub org / MIMB chrome - standardized on v1.1
- Press kit, event collateral, Zoom/Meet backgrounds, business card template - created where missing
- GoodStream Brain project on Claude.ai - v1.1 guide + tokens + surfaces inventory pushed
- Review sites (G2, Capterra, Product Hunt, Crunchbase, AngelList, PitchBook) - refreshed listings

Monitoring after cutover: the MIMB brand-compliance panel shows live GREEN / YELLOW / RED counts per tier. Inventory is re-scored every morning-batch. SLAs govern the ongoing cadence from tomorrow forward.

SECTION 10

Appendix.

Tokens, asset inventory, naming conventions, and a version log. The reference layer.

10.01 - TOKENS.CSS

The tokens, in CSS.

Copy verbatim into any new surface. Source of truth lives at `Good-Stream/monorepo/packages/tokens/tokens.css`.

```

10.03 - ASSET INVENTORY

Canonical file list.

Every master asset for the W3 logo system. Location: `projects/brand-guide-v1/design-system/logos/`. Never hand-edit PNGs - always export from the SVG master.

Wordmark SVGs (6)

FILE	COLORS	USE
`wordmark-primary.svg`	Navy #1A1F2E + Blue #015AEB	Default. Light backgrounds.
`wordmark-light-bg.svg`	Navy + Blue	Alias of primary for soft-white backgrounds.
`wordmark-dark-bg.svg`	All #FFFFFF	Dark backgrounds (navy, charcoal, photos).
`wordmark-mono-navy.svg`	All #1A1F2E	Co-brand lockups, single-ink applications.
`wordmark-mono-white.svg`	All #FFFFFF	Alias for white-on-dark reductions.
`wordmark-mono-black.svg`	All #000000	Print, fax, single-ink.

Favicon SVGs (5)

FILE	COLORS	USE
`favicon-gs-blue.svg`	Blue bg + white GS	Default favicon / app icon.
`favicon-gs-navy.svg`	Navy bg + white GS	Dark-mode favicon / Brief app icon.

`favicon-gs-invert-blue.svg`	White bg + blue GS	On colored surfaces where blue monogram reads better.
`favicon-gs-invert-navy.svg`	White bg + navy GS	Premium print contexts.
`favicon-gs-mono-black.svg`	Black bg + white GS	Single-ink print.

PNG renders (77 files total)

- **Favicons**: each SVG renders at 16, 32, 64, 180 (apple-touch), 256, 512, 1024 = 35 files
- **Wordmarks**: each SVG renders at heights 32, 48, 64, 96, 128, 256, 512 = 42 files

10.04 - NAMING CONVENTIONS

File naming.

SVG masters

```
{family}-{variant}.svg
  family:   wordmark | favicon-gs
  variant:  primary | light-bg | dark-bg | on-blue | mono-navy | mono-white | mono-black |
            gs-blue | gs-navy | gs-invert-blue | gs-invert-navy | gs-mono-black

Examples:
  wordmark-primary.svg
  wordmark-dark-bg.svg
  favicon-gs-blue.svg
  favicon-gs-mono-black.svg
```

PNG renders

```
{family}-{variant}-{size}px.png
  size: integer, pixels (16, 32, ..., 1024)

Examples:
  wordmark-primary-64px.png
  wordmark-dark-bg-512px.png
  favicon-gs-blue-180px.png  // apple-touch size
```

Folder layout

```
projects/brand-guide-v1/
  ├─ GoodStream-Brand-Guide-v1.1.html   // this document
  ├─ GoodStream-Brand-Guide-v1.1.pdf    // rendered output
  ├─ tokens/
  │   ├─ tokens.css
  │   └─ tokens.json
  └─ design-system/
      └─ logos/
          ├─ svg/
          │   ├─ wordmark-*.svg
          │   └─ favicon-gs-*.svg
```

```
        └─ png/
            ├─ wordmark-*-{size}px.png
            └─ favicon-gs-*-{size}px.png
```

10.05 - VERSION LOG

What's changed.

VERSION	DATE	SUMMARY	OWNER
1.1	April 20, 2026	Lock W3 wordmark as canonical following company logo vote. Codify two-color primary (Good=navy, Stream=blue). Add five-variant favicon system. Full token codification in CSS + DTCG JSON. Add Brief sub-brand section. Rewrite Governance to Claude-centric ops model.	Keith Smith
1.0	April 19, 2026	First unified brand guide. Pre-vote concept directions documented. Verbal identity + visual token proposal.	Keith Smith
0.9 (superseded)	February 9, 2026	Original PDF brand reference (colors + type placeholders). Replaced by v1.0.	Keith Smith

Known gaps for v1.2

- Icon library export pack - currently reference Heroicons, ship native SVG set by Q3.
- Motion specimen library - CodePen or video showing the three duration tokens in use.
- Illustration system - if we ever need one (unlikely; product output remains the illustration).
- Extended pitch-deck template in Google Slides (v1.1 ships Keynote master only).

Open questions

- **Private capital positioning:** when does the brand formally adopt "private capital" in market-facing copy? Current answer: 2027-H1, once PE + private credit becomes a funded motion. For now, VC remains the master term with "private capital" reserved.
- **Brief co-branding:** at what point does Brief graduate to its own registered name vs. remain a GoodStream surface? Revisit at 100 daily users.

> "The brand is a product. We ship it like one."
